DSX-Cloud

Cloud-based Access Control

Overview

DSX – Cloud is the New Enterprise Level, Cloud Based Access Control System positioned Securely at DSXCloud.net. With the use of a **DSX-Cloud Adapter** you will be able to connect any supported DSX Hardware to DSXCloud.net. DSX Cloud does not require a Dedicated PC or Server and there is no Software to install. DSX-Cloud is quick and easy to configure and is Subscription Based.

Efficient Communications

Automatic connection and downloads occur each time:

- Changes are made to the DataBase.
- While an operator makes changes to the Location.
- When an alarm is triggered – Which can result in an Email Notification.

Requirements

Any Internet Connected Device using Browsers such as Edge, Chrome, FireFox, and Safari are all this Cloud Based System requires.
